

WE'RE READY! ARE YOU?

IF YOU ABSOLUTELY HAVE TO GET OUT...

We prepare for winter weather year-round. When it comes, we'll do our part to keep drivers safe. But we need you to return the favor. No matter how much NTTA crews treat roads, driving on ice and snow requires low speeds, focused attention and extreme caution.

Heed warnings - If the weather's dicey, maybe it's better to just stay home, but if you absolutely have to get out:

- Maintain distance behind other vehicles, snowplows, sanding equipment and other weather-response vehicles to ensure your safety and the safety of others
- Slow down – high speeds increase your risk of losing control of your vehicle
- Use your brakes sparingly – even with today's computer assisted braking – jamming them on is the most common reason drivers lose control
- Keep your tires properly inflated and ensure that tire tread is not worn – driving on wet or icy roads with inadequate tires causes hydroplaning
- This is not a DIY situation – NTTA Roadside Safety Services is available in all weather conditions if you need help on one of our roads, simply dial #999 on your cell and we'll send help

We're fully stocked with winter-weather supplies and prepared for when ice or snow descends on North Texas.

Now you're good to go for a North Texas winter!
